

[ISSUE-10]: 'Select your location' drop down should stick to site header on mobile

Attach Add a child issue Link issue

Description

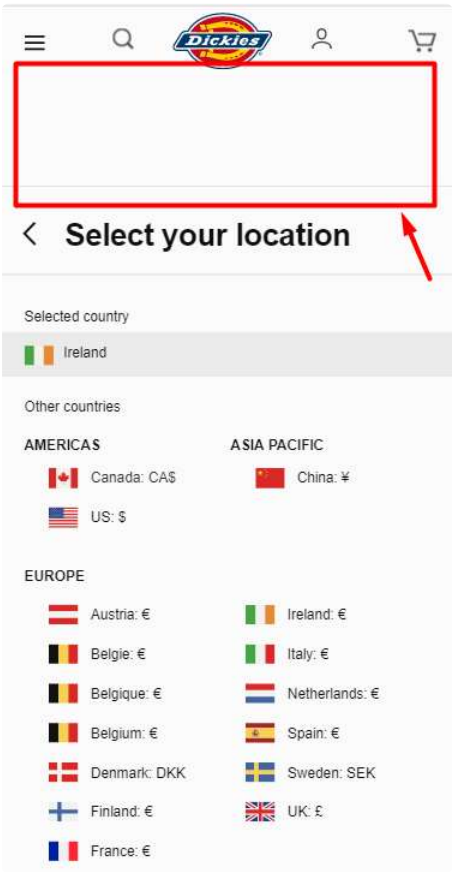

The drop down doesn't stick to the site header (when select your location) and it makes a piece of megamenu visible.

Steps to reproduce:

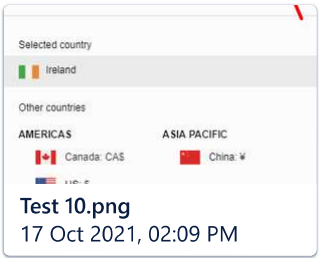

- 1. Open any store view on mobile
- 2. Go to the megamenu
- 3. Click on your selected location to update it.
- 4. Verify 'Select your location' dropdown

Actual result: Megamenu is partially visible above the dropdown. The dropdown has horizontal scroll.

Expected result: 'Select your location' dropdown sticks to the site header and its width corresponds to mobile screen size.
